## DETAILED ACTION

This is in response to amendment filed 07/23/03.

## 1. Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-36 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landry (U.S 5956700) in view of Mamone et al. (U.S 4958291) (Mamone).

Regarding claims 1 and 19, Landry discloses the system and method for processing account information contained in batch process files in an on-line like manner, said method comprising:

reading at least one batch file containing a plurality of records, each of said plurality of records an associated with one of a plurality of accounts (col. 11, lines 64 to col. 12, lines 19, Landry);

identifying which of said plurality of records relate to same ones of said plurality of accounts (col. 12, lines 40-65, Landry);

processing each of said records identified as relating to said selected one of said accounts prior to processing any of said records relating to any other of said plurality of accounts (col. 13, lines 35-60, Landry).

Art Unit: 2171

However, Landry didn't disclose: selecting and restricting access to one of said accounts; removing said restricted access to said selected one of said accounts after all of said records identified with said selected one of said accounts are processed. On the other hand, Mamone discloses: selecting and restricting access to one of said accounts (col. 5, lines 37-39, Mamone); removing said restricted access to said selected one of said accounts after all of said records identified as related to said selected one of said accounts are processed (col. 5, lines 37-41, Mamone). Thus, at the time invention was made, it would have been obvious to a person of ordinary skill in the art to include step selecting and removing said restricted access in the system Landry as taught by Mamone. The motivation being to enable the users improve security level to protect the account information when transaction processing.

Regarding claims 2 and 20, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: further comprising the step of: reporting the results of processing of each of said selected one of said accounts (col. 13, lines 61 to col. 14, lines 16, Landry).

Regarding claims 3 and 21, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: further comprising the step of: storing the results of processing of each of said selected one of said accounts (col. 14, lines 17-39, Landry).

Art Unit: 2171

Regarding claims 4 and 22, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of identifying includes validating said records (col. 20, lines 19-39, Landry).

Regarding claims 5 and 23, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of selecting further comprises; selecting preexisting ones of said accounts prior to new ones of said accounts (col. 20, lines 41-54, Landry).

Regarding claims 6 and 24, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of selecting further comprises: selecting one of said accounts in accordance with a control cycle (col. 13, lines 61 to col. 14, lines 16, Landry).

Regarding claims 7 and 25, most of the limitations of these claims have been noted in the rejection of claims 6 and 24 above, respectively. In addition, Landry/ Mamone disclose: wherein said control cycle is determined autonomously (col. 34, lines 29-55, Landry).

Regarding claims 8 and 26, most of the limitations of these claims have been noted in the rejection of claims 7 and 25 above, respectively. In addition, Landry/ Mamone disclose: where said control cycle is selected from the group consisting of daily, day specific, weekly, monthly, quarterly, yearly (col. 34, lines 29-55, Landry).

Art Unit: 2171

Regarding claims 9 and 27, most of the limitations of these claims have been noted in the rejection of claims 6 and 24 above, respectively. In addition, Landry/ Mamone disclose: wherein said control cycle is determined manually (col. 34, lines 29-55, Landry).

Regarding claims 10 and 28, most of the limitations of these claims have been noted in the rejection of claims 2 and 20 above, respectively. In addition, Landry/ Mamone disclose: wherein said step of reporting occurs at preselected intervals (col. 13, lines 61 to col. 14, lines 16, Landry).

Regarding claims 11 and 29, most of the limitations of these claims have been noted in the rejection of claims 2 and 20 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of reporting occurs upon detection of a predetermined event (col. 21, lines 1-25, Landry).

Regarding claim 12, most of the limitations of this claim have been noted in the rejection of claim 3. In addition, Landry/ Mamone discloses: wherein said step of storing occurs at preselected intervals (col. 10, lines 63 to col. 11, lines3, Mamone).

Regarding claim 13, most of the limitations of this claim have been noted in the rejection of claims 3 and 37 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of storing occurs upon detection of a predetermined event (col. 1, lines 47-50, Mamone). Thus,

Art Unit: 2171

at the time invention was made, it would have been obvious to a person of ordinary skill in the art to include step of storing occurs upon detection of a predetermined event in the system

Landry as taught by Mamone. The motivation being to improve ultimate storing by reducing the time and controlling of any errors occur during the batch process.

Regarding claims 14 and 32, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of processing comprises debiting said selected ones of said accounts (col. 24, lines 41-62, Landry).

Regarding claims 15 and 33, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of processing comprises reconciling said selected ones of said accounts (col. 27, lines 53-67, Landry).

Regarding claims 16 and 34, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of processing comprises creating bills (col. 26, lines 36-56, Landry).

Regarding claims 17 and 35, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose:

Art Unit: 2171

wherein the step of processing comprises determining disbursements (col. 24, lines 41-62, Landry).

Regarding claims 18 and 36, most of the limitations of these claims have been noted in the rejection of claims 1 and 19 above, respectively. In addition, Landry/ Mamone disclose: wherein the step of processing comprises generating notices (col. 21, lines 66 to col. 22, lines 16, Landry).

Regarding claim 30, most of the limitations of this claim have been noted in the rejection of claim 21. In addition, Landry/ Mamone disclose: wherein said storing occurs at preselected intervals (col. 10, lines 63 to col. 11, lines3, Mamone).

Regarding claim 31, most of the limitations of this claim have been noted in the rejection of claim 21. In addition, Landry/ Mamone disclose: wherein said storing occurs upon detection of a predetermined event (col. 14, lines 40-64, Landry).

Regarding claim 40, most of the limitations of this claim have been noted in the rejection of claim 19. In addition, Landry/ Mamone discloses: wherein said input means is selected from the group consisting of: keyboard entry, punch cards, paper tape, magnetic tape, optical media, electronic media, touch-screen entry, communication network (col. 17, lines 39-55, Landry).

Art Unit: 2171

3. Claims 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landry (U.S 5956700) in view of Mamone et al. (U.S 4958291) (Mamone) and further in view of Pare, Jr. et al. (U.S 6154879) (Pare).

Regarding claim 37, most of the limitations of this claim have been noted in the rejection of claim 19. However, Landry/ Mamone didn't disclose: wherein said processor is further operable to: backup said selected ones of said accounts. On the other hand, Pare disclose: wherein said processor is further operable to: backup said selected ones of said accounts (col. 13, lines 25-30, Pare). Thus, at the time invention was made, it would have been obvious to a person of ordinary skill in the art to include step of backup said selected ones of said accounts in the combination system Landry/Mamone as taught by Pars. The motivation being to improve ultimate recovery by reducing the time and controlling of any errors occur during the batch process.

Regarding claim 38, most of the limitations of this claim have been noted in the rejection of claim 37. In addition, Landry/ Mamone/Pare disclose: wherein said backup occurs at preselected intervals (col. 25, liens 25-50, Landry).

Regarding claim 39, most of the limitations of this claim have been noted in the rejection of claim 37. In addition, Landry/ Mamone/Pare disclose: wherein the step of storing occurs upon detection of a predetermined event (col. 1, lines 47-50, Mamone).

### 4. Response to Arguments (filed 07/23/03).

Applicant's arguments have been considered, but are moot in view of the new ground(s) of rejection.

#### 5. Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kenna et al. (U.S 6108641). Integrated nested account financial system with medical savings system with medical saving subaccount.

Hutchings (U.S 5940813). Process facility management matrix and system and method for performing batch processing in an on-line environments.

#### 6. Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cindy Nguyen whose telephone number is 703-305-4698. The examiner can normally be reached on M-F: 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on 703-308-1436. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7240 for After Final communications.

Art Unit: 2171
